

Phase 7: Project Documentation

AI Comic Story Creator — SmartBridge Project Submission

1. Repository Documentation Checklist

- README with project overview, architecture diagram, and setup/run instructions.
- API documentation for each agent function (generate_comic_script, render_panel_image, draw_speech_bubble, ComicLayoutEngine).
- JSON schema reference for the script/character/panel data structures.
- Environment setup: required API keys (e.g. GEMINI_API_KEY), dependencies (google-genai, Pillow, ReportLab), and infrastructure notes (FastAPI, Cloud Run, Cloud Tasks, Cloud Storage).
- Known limitations and troubleshooting section (character drift, rate limits, cost considerations).
- Sample output: at least one generated comic issue included or linked as a demo artifact.

2. Suggested README Structure

- 1. Overview & core capabilities
- 2. System architecture (agent pipeline diagram)
- 3. Setup & installation
- 4. Usage / how to generate a comic
- 5. Data schema reference
- 6. Testing
- 7. Deployment notes
- 8. Known limitations & future work
